

GDPR Basics

When?

GDPR went into effect on May 25, 2018.

What is it?

The General Data Protection Regulation is essentially a set of new rules that govern the data of EU citizens and gives them more control over how organizations use it.

Who will it impact?

The new regulation applies to organizations located within the EU as well as to those outside of the EU that offer goods or services to EU citizens, or monitor their behavior.

Why does it matter?

Any entity that collects and stores personal information from its clients, customers, or website visitors will need to update its practices and ensure protection of that data.

Where does it apply?

GDPR focuses on the individual and not the location of the data so it applies beyond the EU to any organization that processes the data of an EU citizen.

How does it differ?

Both within and outside of the EU. The new regulation focuses on the individual and not the location of the data so it applies beyond the EU to any organization that processes the data of an EU citizen.

Executing dynamic e-discovery

- 01 Align the data processor, client, vendor, and law firm
- 02 Recognize the changing and nature indemnification
- 03 Maximize mobile solutions for processing and hosting
- 04 Honor data access requests by former employees
- 05 Work with an outside provider to ensure compliance
- 06 Redefine data locations
- 07 Avoid confusion in the cloud
- 08 Obtain consents

Elements of compliance

- ▶ Appoint a data protection officer
- ▶ Maintain records of data processing activities
- ▶ Draft privacy impact assessments
- ▶ Understand how to transfer data to third countries
- ▶ Honor the right to be forgotten
- ▶ Implement the right to data portability
- ▶ Plan for a data breach
- ▶ Recognize data controllers and processors
