

# Preserve and search dynamic websites and social media.

Websites and social media accounts hold complex content that constantly changes. Savvy companies and their counsel need a defensible option to preserve this data for litigation and compliance purposes. CRA has the tools and expertise to meet these needs.

**Confirm** target website.

**Crawl** website to identify all accessible content.

**Select** content you want to preserve.

**Capture** content in formats that facilitate search and review.

**Document** results via timestamps.

**Sift** captured content based on search terms, date, location, or other metadata.

**Monitor** and **report** changes over time.

**Defend** results through affidavits, expert reports, and independent testimony.
